ADDENDUM

2

PROJECT: HEAVY TRUCK & EQUIPMENT WASHING

RFP DATE: MAY 28, 2021

RFP TIME: 3:00 P.M.

RFP NO.: CB-2135

The following changes, corrections and/or additions should be made in the specification document for the above referenced project. Proposer should acknowledge receipt of this addendum by signing below and returning with their proposal.

Proposal Due Date:

Change From: May 28, 2021

Change To: June 4, 2021

Deadline to Receive will remain at 3:00 p.m.

Pricing Worksheet:

Please use the revised Pricing Worksheet when submitting proposal. Complete and include Exhibit 2 for Items B-D, Page 7 and Page 8.

The following questions were received, responses follow:

Scope of Work Item 3.

The question regarding 5000psi minimum washing pressure.

The City encourages the use of professional grade equipment and used the 5000psi standard to establish quality equipment. The City encouraged vendors to continue to submit proposals if quality equipment was being used.

Detail of Procedure

The question was regarding hours of service and the possibility of night washing.

The City will provide access to the facility Monday-Friday 8am-5pm as stated in the Detail of Procedure and additional weekend days may be scheduled. The City will consider after hours work (night washing) in the future and a potential vendor should include pricing for this option separately on the pricing worksheet.

The question was regarding how many pieces get washed.

The City is currently up to 4 trucks per week but stated that there is no guarantee of quantity. If a bidder has different pricing based on quantity, it should be included on the pricing worksheet

Pricing

We had multiple questions regarding pricing.

All pricing questions were referred to an addendum with a pricing worksheet. The worksheet will provide multiple methods of pricing and provide evaluators a clear picture of the service being provided.
